Figure 1 illustrates the evolution of a flock of birds from a random distribution to a circular flock. The diagrams are labeled 1 through 10. Diagram 1 shows a random distribution of birds (represented by black dots) and a single leader (represented by a black triangle). Diagram 2 shows the leader moving towards the center. Diagram 3 shows the leader moving towards the center. Diagram 4 shows the leader moving towards the center. Diagram 5 shows the leader moving towards the center. Diagram 6 shows the leader moving towards the center. Diagram 7 shows the leader moving towards the center. Diagram 8 shows the leader moving towards the center. Diagram 9 shows the leader moving towards the center. Diagram 10 shows the leader moving towards the center.

Figure 1 consists of three 10x10 grids, each representing a different stage of a pattern's evolution. The grids are labeled with letters and symbols. The left grid shows a sparse pattern of black and white squares. The middle grid shows a more complex pattern with many black squares. The right grid shows a pattern with many black squares and some white squares. The patterns are labeled with letters and symbols.
